PROJECTS

GOLDEN STORE (An E-commerce web application)

I have created this application using React hooks, Context api, Stripe etc.

I made this application for the easy shopping by adding into carts section.

EASY RECIPE (A search recipe web application)

I build this application using React hooks, Edamam API etc. For the home food maker this application takes lots of opportunities to make wonderful dishes at home.

MENTAL CARE (A service provider web application)

I build this Responsive web application using frontend tools like Basic React, React Router Dom, Scss etc.

The purpose of making this application to book an appointment of mentors and we'll fight together who are suffering from mental health.

PEOPLE'S NEWS APP (Latest news of India)

I build this web application using React Hooks, Bootstrap and Newsdata.io Api.

You can see India's latest news every different categories and feel the light and dark mode while using the application.

INTERESTS

Making Creative Things

Playing Cricket

Reading Non Fiction Books
